

Implications

- **Policy Scenario One gets us close on emissions and meets economic 2030 goals.**
 - Job, GSP, and income growth are positive on average through 2030 and 2050
 - Inflation remains low
- Reductions in VMTs seem to drive economic growth most
 - Although no one policy can be separated through modeling
 - Additional work needed on cost of transportation measures
- Most job gains are in medium-wage jobs with low training requirements
 - Good opportunity to transition new workers, or those who lose their jobs
